

## **RE-CREATE Artists - *Instructions***

1. Look at the first two, attached images that show a famous painting that has been recreated, using a real person or people. NOTICE that it is the most “noticeable” thing or things in the painting that have been re-created.
2. Think about what you could do to re-create the painting using objects and clothing around your house --are there things you could easily make. What about colors? Are the colors of the objects and clothing important? What about the background? What could you use --remember, with imagination, something could become something else. Think about the props in the painting. What do you need? Is there something you could let represent something else?
3. Think about the shapes and colors in the painting. What colors must be the same in what you re-create?
4. Think about the faces --is the face showing joy, anger, fear? You must make that same expression with your face.
5. Think about the movement and the position of the body. How should you stand? Where should you face?
6. What about clothes, hair, hats? \*\*\*Remember not everything has to be exact --the things that stand out in the painting need to be something easily seen in your re-creation.
7. Are there special challenges? Are you trying to create abstract art using yourself? WOW!!! Think of a way you can do this?
